

## **BACKREV.EXE**

BackRev.exe is a tool made for rolling back virus definitions to a known set. This tool is designed to be used with Symantec Antivirus Corporate Edition 8.0 and 7.x. The tool takes in the name of the VDB file (including the file extension) to roll back to. The filename given should not include the file path.

BackRev.exe is meant to run on SAVCorp clients.

Usage:

Backrev.exe <VDB filename>
